

## 2023 Lake Isabel Survey Summary

**Water:** Lake Isabel

**County:** Dewey

**Legal Description:** T17N-R22W-S16

**GPS:** 45.436386, -101.418060

**Surface Area:** 81 Acres

**Class:** Warm Water Permanent

**Maximum Depth:** 25 feet

**Mean Depth:** 8.8 feet

Lake Isabel is an 81-acre impoundment on Firesteel Creek, 2.5 miles north of the City of Isabel in northwest Dewey County. The dam grade and entire lake is within a 640-acre Game Production Area owned and managed by the South Dakota Department of Game, Fish and Parks. A gravel road through the GPA encompasses the lake providing access from SD HWY 65. A concrete plank ramp and dock provide boat access on the north shoreline and an ADA accessible wooden fishing pier is present on the south shoreline. A small park area maintained by the City of Isabel is located near the boat ramp.

Primary game fish managed at Lake Isabel include Largemouth Bass, Black Crappie, Yellow Perch, Bluegill and Walleye. Northern Pike and Black Bullhead also have a historical presence. In 2021 the water level was drawn down to facilitate repair of the outlet structure. Local runoff refilled the impoundment during the spring of 2022. No occurrences of winterkill have been documented at Lake Isabel. A fish consumption advisory on Northern Pike over 25 inches and Largemouth Bass over 17 inches for elevated levels of mercury has been issued at Isabel.

Lake Isabel was surveyed on June 13-15, 2023, utilizing  $\frac{3}{4}$  inch standard frame nets sets and AFS standard gill net sets. Yellow Perch, Bluegill, Black Crappie, Northern Pike, and Walleye were observed during the 2023 survey. Electrofishing was not completed in 2023 to monitor Largemouth Bass, however a healthy bass population is known to be present.

- **Yellow Perch:** 10.8 fish per frame net set were observed with individual lengths ranging between 6 and 12 inches. Many size classes of perch were sampled indicating a well-balanced population. Relative condition (weight at length) was slightly above the state average.
- **Bluegill:** Catch rates were relatively high with 10.6 individuals sampled in each frame net. Many of the Bluegill were young fish between 4 and 6 inches, with several fish around 8 inches also observed. Condition was well above the state average.
- **Black Crappie:** During the 2023 netting efforts 5.8 adult black crappie were captured per frame net. Fish of all sizes were recorded with numerous individuals over 8 inches.
- **Other Species:** 12 Northern Pike and 3 Walleye were also documented during the 2023 fish population survey. Scheduled stockings of Walleye fingerlings occur biannually.

# SOUTH DAKOTA STATEWIDE FISHERIES SURVEY

Isabel, Dewey County

GRA-Lake-613-000

2023

## Lake Information

**Name:** Isabel **Maximum Depth:** 25 Feet  
**County:** Dewey **Mean Depth:** 9 Feet  
**Legal Description:** T17-R22-S16  
**Surface Area:** 107 Acres

## Surveys and Investigations

Survey methods used by gear type, date, and effort.

Gear	Date	Effort
AFS std gill net	Jun 14, 2023	2 net-nights
frame net (std 3/4 in)	Jun 14, 2023	5 net-nights
frame net (std 3/4 in)	Jun 15, 2023	5 net-nights

## **Common Fish Species Present**

Largemouth Bass

Bluegill

Black Crappie

Walleye

Yellow Perch

Northern Pike

---

## Terminology

Catch per unit effort (**CPUE**) refers to the relative abundance of a species. It is defined as the number of fish captured per unit of effort (i.e., number of fish captured per net-night or number of fish captured per hour electrofishing). In this report CPUE is typically given for only stock-length fish (see length categories table for stock lengths).

A statewide effort to help make netting efforts comparable to all waters sampled across the state, occurred in 2017, with a switch to American Fisheries Society gill nets. Past gill netting efforts were completed with different style/types of nets and are not comparable side by side.

- **AFS std gill net** – 80 ft experimental gill net containing eight panels (10 ft each) of varying monofilament meshes of 0.75, 1.00, 1.25, 1.50, 1.75, 2.00, 2.25 and 2.50 inches.
- **std experimental gill net for non-Missouri River waters** - 150 ft experimental gill net containing six panels (25 ft each) of varying monofilament meshes of 0.5, 0.75, 1.00, 1.25, 1.50 and 2.00 inches.
- **std experimental gill net for Missouri River reservoirs** – 300 ft experimental gill net containing six panels (50 ft each) of varying multifilament meshes of 0.5, 0.75, 1.00, 1.25, 1.50 and 2.00 inches.

$$CPUE = \frac{\text{number of fish}}{\text{effort}}$$

Population size structure is quantified using the indices proportional size distribution of quality-length fish (**PSD**) and proportional size distribution of preferred-length fish (**PSD-P**). These indices indicate the proportion of stock-length fish that are equal to or greater than a given length. Minimum lengths for stock, quality and preferred length fish are given in the length categories table.

$$PSD = \left( \frac{\text{number of fish} \geq \text{quality length}}{\text{number of fish} \geq \text{stock length}} \right) \times 100$$

$$PSD - P = \left( \frac{\text{number of fish} \geq \text{preferred length}}{\text{number of fish} \geq \text{stock length}} \right) \times 100$$

Relative weight (**Wr**) is used to quantify fish plumpness. Relative weight is the ratio of what a fish weighs (**W**) compared to a length-specific standard weight (**Ws**) multiplied by 100. Relative weight values of 95-105 are commonly cited as optimum values, but values in the 80s are common during summer sampling in South Dakota.

$$Wr = \left( \frac{W}{W_s} \right) \times 100$$

Confidence intervals (CI) are provided for many of the estimates calculated in this report. The confidence interval provides a range in which the true mean is expected to fall. For example, with an 80% CI we are 80% confident that the interval contains the true value.

Length categories include stock (S), quality (Q), preferred (P), memorable (M) and trophy (T). Length categories for most species have been defined based on a percentage of the world record length for that species. Some species mentioned in this report do not have defined length categories. Length categories for species used in this report are provided in the following table. Measurements are the minimum total length for each category and are reported in inches (in) and centimeters (cm).

Species Name	Stock		Quality		Preferred		Memorable		Trophy	
	(in)	(cm)	(in)	(cm)	(in)	(cm)	(in)	(cm)	(in)	(cm)
Black Bullhead	6	15	9	23	12	30	15	38	18	46
Black Crappie	5	13	8	20	10	25	12	30	15	38
Bluegill	3	8	6	15	8	20	10	25	12	30
Brown Trout	8	20	12	30	16	40	20	50	18	46
Channel Catfish	11	28	16	41	24	61	28	71	36	91
Freshwater Drum	8	20	12	30	15	38	20	51	25	63

## Catch Summary of Stock Length Fish

Catch per unit effort (CPUE), proportional size distribution (PSD), proportional size distribution of preferred length fish (PSD-P), and relative weight (Wr) for species sampled in survey with 80% confidence interval (CI-80).

\* **Methods/Species that ignore stock length**

Gear	Species	Sample Size (n)	Abundance		Stock Density Indices			Condition		
			CPUE	CI-80	PSD	CI-80	PSD-P	CI-80	Wr	CI-80
AFS std gill net	Northern Pike	2	1.0	0.0	100		50		83	5
	Walleye	1	0.5	1.5	100		0		91	
	Yellow Perch	2	1.0	3.1	100		0		93	10
frame net (std 3/4 in)	Black Crappie	74	5.8	2.3	62	9	17	7	104	3
	Bluegill	106	10.6	6.2	48	7	16	5	125	6
	Northern Pike	10	1.0	0.5	100		80		93	3
	Walleye	2	0.2	0.2	50		50		82	2
	Yellow Perch	108	10.8	5.8	50	7	14	5	95	1

## 10-Year Catch Per Unit Effort by Gear and Species

Catch per unit effort (CPUE) and average (Avg) of species across 10 years using different gear types.

\* Methods/Species that ignore stock length

Gear	Species	CPUE										Avg
		2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	
AFS std gill net	Black Crappie					1.3			0.5		0.0	0.60
	Bluegill					0.3			0.0		0.0	0.10
	Northern Pike					2.0			2.5		1.0	1.83
	Walleye					0.8			0.5		0.5	0.60

## Length at Capture

Mean length at capture by age across years sampled, sample size (N).

### Species: Black Crappie

Mean Length (expanded sample number) at capture by age											
Year	N	1	2	3	4	5	6	7	8	9	10+
2023	74	128 (26)	146 (9)	181 (3)		243 (5)	220 (9)	237 (9)	241 (10)	253 (2)	215 (2)
2021	100		160 (20)	176 (18)	213 (38)	233 (4)	232 (18)	260 (1)			
2018	178	126 (6)	145 (51)	198 (18)	203 (23)	209 (29)	219 (15)	222 (16)	222 (15)	246 (6)	241 (2)
2014	81		137 (3)	193 (11)	217 (36)	244 (19)	252 (5)	262 (6)	262 (1)		

### Species: Bluegill

Mean Length (expanded sample number) at capture by age											
Year	N	1	2	3	4	5	6	7	8	9	10+
2023	106		134 (75)	186 (14)	196 (9)	193 (3)	221 (4)	212 (2)		220 (1)	
2021	112		123 (31)		165 (37)		185 (43)	203 (1)			
2018	92		116 (22)	134 (14)	154 (27)	186 (6)	174 (14)	182 (11)			
2014	10			126 (1)	126 (1)	172 (1)	172 (1)	186 (2)	204 (2)	211 (2)	

### Species: Largemouth Bass

Mean Length (expanded sample number) at capture by age											
Year	N	1	2	3	4	5	6	7	8	9	10+
2020	73	204 (8)	251 (10)	296 (5)	325 (7)	340 (6)	368 (9)	388 (1)	401 (7)	427 (9)	473 (11)
2018	71	166 (5)	194 (3)	243 (10)	292 (5)	325 (10)	342 (15)	403 (8)	385 (5)	436 (3)	439 (10)
2014	14	133 (1)				376 (5)	387 (2)	403 (5)		533 (1)	

### Species: Walleye

Mean Length (expanded sample number) at capture by age											
Year	N	1	2	3	4	5	6	7	8	9	10+
2021	2				454 (1)	553 (1)					
2014	12	232 (3)			400 (4)		543 (5)				

### Species: Yellow Perch

Mean Length (expanded sample number) at capture by age											
Year	N	1	2	3	4	5	6	7	8	9	10+
2021	22			191 (1)	190 (19)	270 (1)	185 (2)				

Mean Length (expanded sample number) at capture by age

Year	N	1	2	3	4	5	6	7	8	9	10+
2018	125	146 (56)	156 (29)	179 (7)	196 (22)	216 (8)	237 (3)				
2014	11			162 (4)		227 (6)	244 (1)				

## **Fish Condition**

Mean relative weight (Wr) by sample size (N), length category stock to quality (S-Q), quality to preferred (Q-P), preferred to memorable (P-M), and memorable (M) for species collected across survey years with standard error (SE).

Species	Year	Length Groups							
		S-Q		Q-P		P-M		M	
		N	Wr (SE)	N	Wr (SE)	N	Wr (SE)	N	Wr (SE)
Black Crappie Frame Net	2021	41	109 (0.8)	56	99 (0.8)	3	92 (1.3)	0	
	2023	22	112 (3.0)	26	102 (3.2)	10	94 (1.4)	0	
Bluegill Frame Net	2021	38	112 (1.1)	71	109 (0.8)	4	104 (2.8)	0	
	2023	55	134 (7.9)	34	120 (4.2)	17	106 (1.4)	0	
Largemouth Bass Electro Fishing	2019	18	103 (3.2)	20	107 (3.1)	30	105 (1.5)	3	108 (6.1)
	2020	21	106 (2.1)	22	104 (2.2)	29	107 (3.8)	1	114
Northern Pike Gill Net	2021	0		2	95 (0.4)	7	99 (2.7)	1	94
	2023	0		1	79	1	87	0
