Weed Spraying Specifications

The contractor does hereby agree to furnish the necessary equipment, materials and labor to control the growth of declared noxious weeds within the right-of way of state routes as shown on the attached map (Exhibit A).

Spraying

The spraying shall consist of spot treatments and shall be accomplished by using the herbicides specified on the contract (or equivalent) with applicable rates as recommended by the manufactured. If herbicide is needed that is not on this contract, the type and price shall be negotiated and added by Change Order, prior to use of the herbicide.

The contractor agrees to indemnify, save, and hold harmless the Department and all its employees and agents, from any and all claims, demands, actions or cause of action of whatsoever nature or character arising out of, or by reason of, the execution of performance of the work provided for under the contract whether or not the Contractor itself is negligent or otherwise culpable. The Contractor further agrees to defend at its own sole cost and expense any action or proceeding commenced for the purpose of asserting any claim on whatsoever nature or character arising under this contract whether or not the Contractor is itself negligent or otherwise culpable. This section does not require the Contractor to be responsible for or defend against claims or damages arising solely from acts or omissions of the State, its officers or employees.

The spraying shall be accomplished by personnel properly licensed by the South Dakota Department of Agriculture.

The Contactor shall advise the local Maintenance Supervisor of his intent to spray, 48 hours prior to doing so.

The Contractor shall complete the attached daily form (DOT 820) "Contract Daily Pesticide Application Record" (Exhibit B), furnished by the Department, after each day of spraying.

The Contractor shall provide the Maintenance Supervisor with a complete copy of the daily form (DOT 820) within One week after completing the spraying.

The Contractor shall submit an invoice for payment to the Area Engineer or Maintenance Supervisor (as instructed). The invoice shall be accompanied by the completed original daily form(s) DOT 820. Separate invoices may be submitted for the spring and fall sprayings, if the Contractor desires to do so.

The herbicide selected for use will dictate frequency and timing of application. If two applications are required per growing season, the first shall be made in the spring of the year while the second shall be made in the late summer or early fall as directed by the Maintenance Supervisor. For herbicides requiring a single application, the application shall be made in accordance with the label for the product being used.

Equipment used for spraying shall be an ATV capable of navigating the highway ditches to allow for identification and direct treatment of weeds. Support vehicles shall be equipped with flashing amber lights. The lights shall be turned on and used at all times when the vehicle is on the roadway.

Growth Suppression

The following locations shall be treated for growth suppression:

- 6 foot radius around all sign and delineator posts.
- 2. Underneath and 3 foot behind guide rail.

Herbicides shall be applied uniformly with properly calibrated equipment using manufacturers recommended rates and concentration.

Herbicides for growth suppression shall be applied in the spring of the year. Herbicides shall not be applied to vegetation that has exceeded 8" in height.
