ADDENDUM NO. 1

RE: April 27, 2023 Rapid City Region Office Informal Letting 000N-451, Lawrence County, PCN i74f Hazard Tree Removal on Hwy 14A

TO WHOM IT MAY CONCERN:

The following addenda to the plans shall be inserted and made part of your proposal for the referenced project.

PROPOSAL:

• No change.

PLANS:

Replace Sheet 3 with attached Sheet 3. Removal of trees from the project limits will
not be required. Cut trees will be left on site and placed on the ground.

Sincerely,
John Rehorst
Region Design Engineer

COMMITMENT H: WASTE DISPOSAL SITE

The Contractor will furnish a site(s) for the disposal of construction and/or demolition debris generated by this project.

Action Taken/Required:

Unless noted in these plans, construction and/or demolition debris may not be disposed of within the Public ROW.

The waste disposal site(s) will be managed and reclaimed in accordance with the following from the General Permit for Construction/Demolition Debris Disposal Under the South Dakota Waste Management Program issued by the Department of Agriculture and Natural Resources.

The waste disposal site(s) will not be located in a wetland, within 200 feet of surface water, or in an area that adversely affects wildlife, recreation, aesthetic value of an area, or any threatened or endangered species, as approved by the Environmental Office and the Project Engineer.

If the waste disposal site(s) is located such that it is within view of any ROW, the following additional requirements will apply:

- 1. Construction and/or demolition debris consisting of concrete, asphalt concrete, or other similar materials will be buried in a trench separate from wood debris. The final cover over the construction and/or demolition debris will consist of a minimum of 1 foot of soil capable of supporting vegetation. Waste disposal sites provided outside of the Public ROW will be seeded in accordance with Natural Resources Conservation Service recommendations. The seeding recommendations may be obtained through the appropriate County NRCS Office. The Contractor will control the access to waste disposal sites not within the Public ROW with fences, gates, and placement of a sign or signs at the entrance to the site stating, "No Dumping Allowed".
- 2. Concrete and asphalt concrete debris may be stockpiled within view of the ROW for a period not to exceed the duration of the project. Prior to project completion, the waste will be removed from view of the ROW or buried, and the waste disposal site reclaimed as noted above.

The above requirements will not apply to waste disposal sites that are covered by an individual solid waste permit as specified in SDCL 34A-6-58, SDCL 34A-6-1.13, and ARSD 74:27:10:06.

Failure to comply with the requirements stated above may result in civil penalties in accordance with South Dakota Solid Waste Law, SDCL 34A-6-1.31.

All costs associated with furnishing waste disposal site(s), disposing of waste, maintaining control of access (fence, gates, and signs), and reclamation of the waste disposal site(s) will be incidental to the various contract items.

COMMITMENT I: HISTORIC PRESERVATION OFFICE CLEARANCES

The SDDOT has obtained concurrence with the State Historic Preservation Office (SHPO or THPO) for all work included within the project limits and all department designated sources and designated option material sources, stockpile sites, storage areas, and waste sites provided within the plans.

Action Taken/Required:

All earth disturbing activities not designated within the plans require a cultural resource review prior to scheduling the pre-construction meeting. This work includes but is not limited to: Contractor furnished material sources, material processing sites, stockpile sites, storage areas, plant sites, and waste areas.

The Contractor will arrange and pay for a record search and when necessary, a cultural resource survey. The Contractor has the option to contact the state Archaeological Research Center (ARC) at 605-394-1936 or another qualified archaeologist, to obtain either a records search or a cultural resources survey. A record search might be sufficient for review if the site was previously surveyed; however, a cultural resources survey may need to be conducted by a qualified archaeologist.

The Contractor will provide ARC with the following: a topographical map or aerial view in which the site is clearly outlined, site dimensions, project number, and PCN. If applicable, provide evidence that the site has been previously disturbed by farming, mining, or construction activities with a landowner statement that artifacts have not been found on the site.

The Contractor will submit the cultural resources survey report to SDDOT Environmental Office, 700 East Broadway Avenue, Pierre, SD 57501-2586. SDDOT will submit the information to the appropriate SHPO/THPO. Allow **30 Days** from the date this information is submitted to the Environmental Engineer for SHPO/THPO review.

In the event of an inadvertent discovery of human remains, funerary objects, or if evidence of cultural resources is identified during project construction activities, then such activities within 100 feet of the inadvertent discovery will immediately cease and the Project Engineer will be immediately notified. The Project Engineer will contact the SDDOT Environmental Office, who will contact the appropriate SHPO/THPO within 48 hours of the discovery to determine an appropriate course of action.

SHPO/THPO review does not relieve the Contractor of the responsibility for obtaining any additional permits and clearances for Contractor furnished material sources, material processing sites, stockpile sites, storage areas, plant sites, and waste areas that affect wetlands, threatened and endangered species, or waterways. The Contractor will not utilize a site known or suspected of having contaminated soil or water. The Contractor will provide the required permits and clearances to the Project Engineer at the preconstruction meeting.

SDDOT ROW CORNERS

The SDDOT right-of-way is marked with a rebar with aluminum cap and a brown Carsonite post at key points. Contractor will take care to not disturb these right-of-way points during the project. Any corners and/or Carsonite disturbed by the contractor will be replaced.

CLEAR AND GRUB TREE

The hazard trees to clear on this project are described as dead or dying that are immediate hazards to the highway. These hazard trees will be cut and placed on the ground. Additional cutting might be needed to ensure the tree is placed properly on the ground.

If the Contractor plans to convert the trees to a saleable product and remove from Forest Service land, then the Contractor will notify the Forest Service to obtain the necessary permits.

Limbs removed from trees will be placed outside the clear-zone. The clear-zone width is 10' measured from the travel lane for posted speeds 40 mph or less highways. The clear-zone width is 30' measured from the travel lane for posted speeds greater than 40 mph highways.

Limbs will be bucked and slashed to a height of less than 18" onsite.

Before clearing activities begin, the Contractor will contact the Project Engineer to identify what trees are to be cleared on the project.

The Contractor will avoid rutting and excessive soil disturbance during operations. If excessive rutting or soil disturbance occurs, the Contractor will stop operations and wait until the soil achieves enough strength to support equipment or change operation and complete the work with some other less soil disturbing method.

Extra care will be taken not to damage other nearby trees during the clearing process.

The Contractor will avoid wetlands, streams, and riparian areas during operations.

The Contractor is responsible for keeping the roadway clear of debris. No separate payment will be made for this work.

The Contractor will grade and level the soil to the original condition if disturbed by clearing activities. No separate payment will be made for this work.

All work descried in this section will be incidental to the contract unit price bid per each for Clear and Grub Tree.
